Philosophie

Wir suchen in unserer täglichen Arbeit stets nach einer Architektur, die Antworten gibt auf das komplexe Zusammenspiel von Themen wie Ökonomie, Ökologie, Soziologie und modernen Bedürfnissen.

Ein Projekt zu entwickeln heisst für uns mehr als nur eine bauliche Intervention zu planen. Jedes Projekt hat seine ganz spezifischen Parameter und je besser das architektonische Konzept darauf antwortet, desto stärker wird die Architektur. Wir involvieren deshalb bereits zu einem frühen Zeitpunkt Spezialisten aus anderen Disziplinen (Bauingenieur, Bauphysiker, Landschaftsarchitekt, Kostenplaner, etc.) und sehen deren Input als integralen Bestandteil unseres Entwurfes.
